## Message From The General Manager

---

We continue to complete major projects worldwide thanks to the trainings received in Germany, our great interest in the sector and the experience we have gained from our work.

Each project was a way of increasing success for us and we are proud to see that our customer satisfaction. Our architects and designers have full of confidence to accomplish high level of complexity projects.

All of our kitchen, bathroom, door, rail cupboard, cloakroom projects that need high expertise, hardware and technology are completed in all areas that require service. It meets all your needs with our expert staff in turn-key process and after-sales service from the beginning of the project.

The right material and the right technical are the most important factors in customer satisfaction. The project can only form a whole with the appropriate design. You can feel your project and yourself safe with our expert architects, R & D team and quality control team.

VITEM

**Vitem, the seeds of which have been thrown in Germany in the 1980s, started its activities in Turkey in 1997, in Antakya in a workshop of 350 m2 with 5 employees.**

Blending professional architectural design with a disciplined development and production system, it has become a growing and developing business with each passing year. Vitem, which continues its activities today with its 80 employees in its production facility with a 3500 m2 closed area at full speed, will be moved to its new factory of 14.000 m2 in 2018 and will take another step towards its goals to become a national brand.

Vitem realizes all products which have been designed, developed and manufactured with its staff of architects and engineers, and applies the principles of professional management in every unit of its organization and in all processes in a disciplined manner. Working with Computer Aided Drawing (CAD) and Computer Aided Manufacturing (CAM) systems, Vitem is implementing a workflow that minimizes human errors with many high technology machines, especially CNC machines, in the production.

## Quality Standards

Vitem monitors all processes from the design stage to the assembly, with a perfected quality standardization. Unlike the usual practices in its sector, its professional management and production staff consists of architects and engineers. In this way, all the steps from raw materials to production systems, computer aided drawing studies to technical service processes are applied according to the principles of professional approach and business excellence.

### Our Mission

To contribute to regional and national economy by offering products and services at national standards

### Our Vision

To become one of the most preferred companies by becoming a national brand.

### Our Values

Customer Focused  
Uncompromising Quality  
Innovative, Entrepreneur, Pioneer

Honest and reliable  
Embracing Business and Focusing on Result  
Respecting Nature and Human

## Service Standards

### Architectural Project that Suits Your Home

With detailed measurements of your living areas, Vitem architects offer you in detail the most suitable designs to your liking. The projects created with high standards, processing every detail carefully, reflect Vitem quality.

### 5 years warranty

Vitem products are guaranteed for 5 years against material and manufacturing defects. Vitem is behind all the products you can use for years without any problems and with the quality of the first day.

### Design

Vitem models are designed by following worldwide trends and fashion details. So you have the quality of aesthetics and ergonomics on a global scale.

### High Technology

Vitem serves to achieve maximum quality by minimizing human errors. Provides flawless products with state-of-the-art development and production systems of industry.

### Unlimited Technical Service

24/7 Technical Service shows the basic servicing concept that Vitem has never given up since its establishment. You can be sure that all your problems will be solved as quickly as possible with a professional team.

## Technical Superiorities

Vitem has a technical capability that goes beyond both the regional and national scale standards. Products developed using computer aided design and drawing (CAD) programs are modeled using the same program on a customer basis and visualized as close as possible to the reality appropriate to the customer's living spaces.

In the production phase, computer-aided manufacturing systems (CAM) which are high-tech and minimize human errors are engaged. Every detail is produced untouched by human hands to a great extent and delivered to the customers.

All processes, passing through high precision quality control stages, are carried out smoothly and according to your living spaces.

## Research & Development

Vitem develops innovative ideas in line with its R & D activities and thus leads the sector. While carrying out the activities of the global competitive environment, the Company carries out its activities with the aim of making a difference to its competitors and increasing the production and product quality to the level of world technologies.

Vitem aims to plan and carry out R & D activities in order to create and adapt innovative technologies in the most appropriate way to its objectives, and to realize its activities by creating R & D strategies. While producing R & D projects within the framework of the targeted principles, it aims to contribute to the whole world and the sector in which it operates.

Vitem's sustainable success in its projects is crucial for its future. The mission of Vitem R & D is to learn, develop and apply technological innovations in the world and to increase the quality of new products and usage areas. Specializing in R & D team, experienced in research and development, aware of the latest technology; architects and engineers
